TUSHAR T PATGAR

Data Engineer | ETL Developer
Bengaluru, India | +91 8861897218 | tusharpatgar1@gmail.com

PROFESSIONAL SUMMARY

Data Engineer with 1.4 years of experience in designing, developing, and optimizing enterprise-scale ETL/ELT pipelines and cloud-based data solutions across FinTech and analytics domains. Strong proficiency in Python, SQL, PySpark, Apache Spark, Databricks, SSIS, and AWS services, with expertise in data ingestion, transformation, incremental processing, and Change Data Capture (CDC). Hands-on experience implementing Bronze–Silver–Gold (Medallion) architecture, Delta Lake transformations, data quality validation, reconciliation, and performance optimization. Skilled in building reliable, scalable, and analytics-ready data pipelines that support enterprise reporting, data integrity, regulatory requirements, and business intelligence.

TECHNICAL SKILLS

Programming & Query Languages: Python, SQL, T-SQL, Spark
Data Engineering & ETL: ETL/ELT Pipeline Development, Data Ingestion, Incremental Processing, Change Data Capture (CDC), Data Quality Validation, Data Modelling, Data Warehousing, SCD Type 1 & Type 2
Cloud & AWS Services: Amazon S3, AWS Glue, AWS IAM, Amazon Redshift, AWS DMS, Amazon Athena, AWS Lambda, AWS Step Functions, Amazon CloudWatch
Big Data & Distributed Processing: Apache Spark, Spark SQL, Kafka (Batch & Streaming Data Processing), Databricks, Delta Lake, Medallion Architecture (Bronze/Silver/Gold), Partitioning, Parquet
Databases: SQL Server, PostgreSQL, MySQL, Snowflake
Orchestration & Transformation: Apache Airflow, DBT, Docker
DevOps & Development Tools Git, GitHub, GitHub Actions (CI/CD), AWS CLI, Linux, SSMS, SSIS

PROFESSIONAL EXPERIENCE

Wissen Digital Pvt Ltd– Bengaluru

Software Engineer | July 2026 – Nov 2026

- Developed and maintained Python- and SQL-based data pipelines for data ingestion, transformation, and downstream analytics workflows
- Engineered AWS-based data processing solutions using S3, Lambda, Glue, EC2, and Redshift to support scalable cloud data platforms
- Implemented data validation frameworks and transformation logic to improve reliability of analytics ready datasets for business intelligence
- Supported incremental data processing, pipeline monitoring, and troubleshooting of ETL workloads to ensure data quality and availability

Endava Solutions Pvt. Ltd – Bengaluru

Data Engineer / ETL Programmer | Jan 2025 – Jan 2026

- Designed, developed, and optimized complex SSIS-based ETL pipelines processing high-volume financial and transactional datasets.
- Implemented end-to-end data extraction, transformation, cleansing, and validation logic using SSIS and SQL Server.
- Built reconciliation frameworks and data quality checks to detect mismatches, null anomalies, and schema inconsistencies.
- Supported enterprise-scale data migrations involving SQL Server databases, SSIS packages, and mainframe data feeds.
- Actively participated in live production cutovers and mergers, ensuring minimal downtime and strict data integrity.
- Coordinated with QA, business analysts, and client stakeholders to validate data accuracy post-deployment. - Worked across development, testing, and production environments following controlled release and change management processes.

KEY PROJECTS

SQL Data Warehouse (Personal): Designed and implemented layered Bronze-Silver-Gold data warehouse with star schema modelling for analytical reporting Developed T-SQL-based ETL workflows with historical tracking and optimized analytical queries to support business insights
Technologies: SQL Server, T-SQL, Data Warehousing, Star Schema, ETL Development

Walmart Sales Analytics: Built scalable Spark ETL pipelines with explicit schema enforcement and business-rule transformations for sales data analysis Implemented time-based aggregations, performance tuning, and Delta Lake incremental loads using MERGE INTO operations
Technologies: Databricks, Spark, Delta Lake, SQL, ETL Optimization

AWS CDC Pipeline: Implemented automated Change Data Capture pipeline using AWS RDS (MySQL), DMS, Lambda orchestration, and Glue ETL jobs Designed S3-based storage architecture with CloudWatch monitoring for reliable incremental data processing and pipeline observability
Technologies: AWS (RDS, DMS, Lambda, Glue, S3, CloudWatch), Python, Spark, Change Data Capture

CERTIFICATIONS

Python for Data Science Certification – O'Reilly
Microsoft SQL Server Certification – O'Reilly
SQL Server Integration Services (SSIS) Certification – O'Reilly
PySpark & AWS: Master Big Data- O'Reilly

EDUCATION

Bachelor of Computer Applications (BCA) | 2020 – 2023
